

A line graph showing the relationship between Spectral Power (x-axis) and the Number of Pixels (y-axis). The curve starts at the origin (0,0), rises to a first peak labeled 55, then falls to a local minimum, rises again to a second, higher peak labeled 56, and finally falls. A vertical dashed line is drawn from the x-axis to the second peak. A horizontal dashed line is drawn from the second peak to the y-axis, which is labeled 54. The label 54 is positioned to the right of the y-axis.
